

17th EUROPEAN
CONFERENCE ON
THERMOPHYSICAL
PROPERTIES

COLLECTION OF MANUSCRIPTS

September 5 - 8, 2005
BRATISLAVA, SLOVAKIA

Slovak Academy of Sciences, University of Pau,
Constantine the Philosopher University

17th EUROPEAN CONFERENCE
ON THERMOPHYSICAL PROPERTIES

COLLECTION OF MANUSCRIPTS

Edited by
L. Vozár, I. Medved', Ľ. Kubičár

September 5 - 8, 2005
BRATISLAVA, SLOVAKIA

CONTENTS

| Thermophysical properties of fluids | 16 |
| Theory and modelling | 20 |
| Novel experimental techniques and devices | 21 |
| Thermophysics for engineering applications | 23 |

PLENARY LECTURES

[Vacuum insulation panels – exciting thermal properties and convincing applications](#)

J. Fricke, U. Heinemann, H. Schwab

[Applications of micro and nano-scale thermo-physical properties sensing for novel fluids and solids](#)

Y. Nagasaka

[Molecular simulation of the thermophysical properties of fluids: from understanding toward quantitative predictions](#)

P. Ungerer, G. Ahunbay, V. Lachet, C. Nieto-Draghi, B. Rousseau

[From armco iron to pyroceram 9606 and back. A fifty eight year journey in and through thermal conductivity measurements](#)

R. P. Tye

[A bridge between thermophysics and material sciences](#)

M. J. Lourenço

ORAL PRESENTATIONS

Advanced materials

[Thermophysical properties of advanced heat sink materials](#)

E. Neubauer, P. Angerer, G. Korb

[Thermophysical analysis of Gioia marble in dry and saturated stage by pulse transient method](#)

V. Vretenár, L. Kubičár, V. Boháč, P. Tiano

[Self-referential Monte-Carlo method for calculating the free energy of crystalline solids](#)

M. B. Sweatman

[Thermophysical characterization of CrN deposit](#)

J. L. Battaglia, A. Kusiak

[Examination of bond strength and tribological properties of ceramic-polymer composite coating formed by plasma and flame spray](#)

R. Samur, H. Demirer

[A network database system for thermophysical property data](#)

T. Baba, A. Ono

[Thermal and electrical properties of a suspended nanoscale thin film](#)

X. Zhang, H. Xie, M. Fujii, H. Ago, K. Takahashi, T. Ikuta, H. Abe, T. Shimizu

[Influence of thermal strain on thermal properties of composites](#)

A. Rudajevová, S. Kúdela jr., S. Kúdela

[Characterization of thin films using scanning thermal microscopy](#)

L. David, S. Gomès, B. Vassort, P. Galland, M. Raynaud

[Numerical and experimental studies on thermal contact resistance at solid-solid interfaces](#)

X. Zhang, P. Cong, Y. Ren, M. Fujii

[Improved access to thermophysical properties data with evitherm](#)

G. Neuer, J. Redgrove, D. Talebi

[Density measurement of molten CaF₂ by an electrostatic levitator](#)

I. Minato, H. Fukuyama, T. Ishikawa, P. F. Paradis, J. Yu, S. Yoda

[Refractive index measurements on CaF₂ single crystal and melt using ellipsometry](#)

S. H. Firoz, T. Sakamaki, R. Kojima, M. Susa

[Thermal fields monitoring when growing large alkali halide single crystals from melt](#)

O. Ts. Sidletskiy, V. I. Goriletsky, B. V. Grinyov, M. M. Tymoshenko, O. V. Sizov, V. V. Sumin

[Influence micromechanisms fracture fibres on destruction unidirectional composite](#)

G. H. Narzullaev

[A microscopic theory of current density spikes associated with phase transitions on crystalline electrodes](#)

I. Medved', D. A. Huckaby

[The calculation of thermal conductivity for nanofluids containing nanoparticles and nanotubes](#)

J. Avsec

[Thermophysical properties of ceramic substrates with modified surfaces](#)

M. Rohde

High temperatures

[Density and surface tension of liquid ternary Ni-Cu-Fe alloys](#)

J. Brillo, I. Egry, T. Matsushita

[Advances in the mass-spectrometric studies of the laser-induced vaporisation of graphite and uranium dioxide](#)

R. Pflieger-Cuvellier, M. Sheindlin, J. Y. Colle

[A critical review of the European guarded hot plate standard for operation at high temperatures](#)

D. R. Salmon, R. P. Tye, N. Lockmuller, C. Stacey

[Parametric estimation of thermo-radiative properties of materials based on harmonic excitation](#)

B. Agoudjil, S. Datcu, A. Boudenne, L. Ibos, Y. Candau

[Impact of auto-irradiation on the thermophysical properties of oxide nuclear reactor fuels](#)

D. Staicu, T. Wiss, M. Sheindlin, V. V. Rondinella, J. P. Hiernaut, C. Ronchi

[Viscosities of nickel base super alloys](#)

Y. Sato, K. Sugisawa, D. Aoki, T. Yamamura

[Development of thin heater apparatus for high temperature thermal transmission properties](#)

E. G. Wolff, J. E. Sharp, D. A. Schneider, B. C. Nielsen

Radiation

[Thermophysical properties of substances at high temperatures and high pressures](#)

V. E. Fortov

[Optical properties \(at a wavelength of 684.5 nm\) and radiance temperatures at the melting point of group VIIIb transition metals cobalt, nickel, palladium and platinum](#)

C. Cagran, B. Wilthan, G. Pottlacher

[Radiative properties of dense fibrous media in dependent scattering regime](#)

R. Coquard, D. Baillis

[From transparency to opacity in dielectric compounds with increasing of the temperature](#)

P. Echegut, J. F. Brun, D. De Sousa Meneses

[Influence of the texture on the normal spectral emittance of a fused silica glass](#)

B. Rousseau, D. De Sousa Meneses, J. F. Thovert, P. Echegut

[Measurement of total hemispherical emissivity using a calorimetric technique](#)

J. Hameury, B. Hay, J. R. Filtz

[Simultaneous measurement of temperature, thermal diffusivity, thermal conductivity and spectral emissivity by photothermal radiometry](#)

M. Broussely, A. Levick, G. Edwards

[ARMCO iron normal spectral emissivity measurements](#)

L. del Campo, R. B. Pérez-Sáez, M. J. Tello, X. Esquisabel, I. Fernández

[Measurement of directional spectral emissivities of microstructured surfaces](#)

J. Gengenbach, S. Kabelac, L. R. Koirala

[Experimental investigation of thermo-optical characteristics of refractory dielectric materials in a field of high intensity radiation](#)

Yu. Yu. Protasov, A. M. Semenov

Processes

[Prediction of properties of steels relevant to process simulation](#)

J. A. J. Robinson, A. W. D. Hills, A. T. Dinsdale, R. F. Brooks, L. A. Chapman, B. Roebuck, P. N. Quested

[Thermophysical properties of silicon carbide green bodies prior to, during and after the sintering process](#)

J. Blumm, J. Opfermann

[Thermal conductivity of polymer melts and implications of uncertainties in data for process simulation](#)

A. Dawson, M. Rides, J. Urquhart, C. S. Brown

[Thermal conductivity of amorphous carbon as a function of pyrolysis temperature](#)

M. Wiener, G. Reichenauer, F. Hemberger, H. P. Ebert

[Thermal conductivity of high temperature multicomponent materials with phase change](#)

K. Severing do Couto Aktay, R. Tammé, H. Müller-Steinhagen

Applications

[Multi-scale modelling of radiation heat transfer through nanoporous superinsulating materials](#)

F. Enguehard

[Thermal properties of mineral wool materials partially saturated by water](#)

M. Jiříčková, Z. Pavlík, P. Michálek, J. Pavlík, R. Černý

[Effective thermal conductivity of metallic foams determined with the transient plane source technique](#)

Th. Fend, O. Reutter, J. Sauerhering, K. Severing do Couto Aktay, R. Pitz-Paal, S. Angel

[Thermophysical analysis of high modulus composite for satellite structure](#)

H. S. Lee, K. J. Min

[Comparison of thermal conductivities of highly insulating materials and estimation of thermoradiative properties of coatings in spatial conditions](#)

M. Varenne-Pellegrini, L. Puigsegur, J. Pavie, T. Lanternier

[Gas-atmosphere and pore size distribution effects on the effective thermal conductivity of nano-scaled insulations](#)

U. Gross, G. Barth, R. Wulf, K. Raed

[Thermal conductivity of xonotlite insulation material](#)

G. Wei, X. Zhang, F. Yu

Phase equilibria

[Thermal-wave photoacoustic setup for precise measurements of thermal diffusivity for liquids](#)

J. A. Balderas-López

[Thermophysical properties of mixtures containing imidazolium based ionic liquids. Experimental results of liquid-liquid equilibria and liquid-liquid interphase tension along the coexistence curve](#)

J. K. Lehmann, C. Wertz, A. Tschersich, A. Heintz

[Experimental determination of enthalpy of dissolution and solubility of CO₂ in aqueous 2-amino-2-methyl-1-propanol \(AMP\)](#)

L. Rodier, H. Arcis, D. Koschel, J. Y. Coxam

[High pressure phase equilibria in methane + synthetic waxes: Influence of the light gas proportion](#)

J. Pauly, J.-L. Daridon, J. A. P. Coutinho

[Liquid-liquid equilibrium between water and ionic liquids](#)

M. G. Freire, L. M. N. B. F. Santos, I. M. Marrucho, J. A. P. Coutinho

[Excess properties of the ternary mixture tert-amyl methyl \(TAME\) + methanol + hexane at 313.15 K](#)

C. Alonso-Tristán, M. C. Martín, J. J. Segovia, C. R. Chamorro, E. A. Montero, M. A. Villamañán

Volumetric and acoustic properties

[Speed of sound measurements in n-nonane at temperature between 294 and 394 K and at pressure up to 100 MPa](#)

S. Lago, P. A. Giuliano Albo, R. Spagnolo

[Measurements of the speed of sound in liquid propane under high pressures](#)

K. Meier, S. Kabelac

[Speed of sound predictive modeling in a three-parameter corresponding states format. Application to pure and mixed haloalkanes](#)

G. Scalabrin, P. Marchi, M. Grigante

[Corresponding states modeling of the speed of sound of long chain hydrocarbons](#)

A. J. Queimada, I. M. Marrucho, J. A. P. Coutinho, J. L. Daridon

[Interfacial tension measurements and modeling of hydrocarbon + water systems](#)

A. J. Queimada, C. Costa, C. Miqueu, G. M. Kontogeorgis, I. M. Marrucho, J. A. P. Coutinho

[Modelling of the density profile and surface tension of pure liquid-vapour interface](#)

H. Lin, Y. Y. Duan

Volumetric properties

[Volumetric properties of dilute aqueous solutions of organic solutes in extended ranges of temperature and pressure: Experiment, data, and new observations](#)

L. Hnědkovský, I. Cibulka

[Measurements of \(p, \$\rho\$, T\) properties for propane in the temperature range from 280 K to 440 K at pressures up to 200 MPa](#)

H. Miyamoto, M. Uematsu

[p \$\rho\$ T measurements and EoS predictions of ester lubricants up to 45 MPa](#)

O. Fandiño, J. García, , M. J. P. Comuñas, E. R. López, J. Fernández

[Critical phenomena in binary hydrocarbon-water systems](#)

G. V. Stepanov, S. M. Rasulov, V. A. Mirskaya, A. R. Rasulov

Modelling

[Thermal conductivity of nanofluids – Theoretical review and simulation](#)

M. J. Assael, I. N. Metaxa, K. Kakosimos, D. Konstadinou

[Modeling of the speed of sound of heavy hydrocarbons using equation of state](#)

Th. Laffite, D. Bessières, M. M. Piñeiro, J. L. Daridon

[Spectroscopic and thermodynamic studies of alcohol + alkane and alcohol + amine mixtures based on quantum mechanical ab initio calculations of molecular clusters](#)

D. Wandschneider, A. Heintz

[Thermophysical properties of low density neat n-alkanes and their binary mixtures calculated by means of a \(n-6\) Lennard-Jones temperature-dependent potential](#)

U. Hohm, L. Zarkova, M. Damyanova

[Thermodynamic properties of fluids from molecular simulation](#)

R. J. Sadus

Refrigerants

[Thermal diffusivity, sound speed, viscosity and surface tension of R227ea \(1,1,1,2,3,3,3-heptafluoropropane\)](#)

A. P. Fröba, C. Botero, A. Leipertz

[A reference multiparameter thermal conductivity equation for R134a in optimized functional form](#)

G. Scalabrin, P. Marchi, F. Finezzo

[Reliable thermophysical-property calculation for refrigerants R32, R125, R134a, R143a, R152a, R410A and hydrocarbons having theoretical background](#)

H. Sato, I. M. Astina, T. Adachi, K. Okabe, M. Yasui

[Isothermal vapour-liquid equilibrium measurements and correlation for the pentafluoroethane + cyclopropane and the cyclopropane + 1,1,1,2-tetrafluoroethane binary systems](#)

L. Fedele, S. Bobbo, M. Scattolini, R. Camporese

[Second and third virial coefficients for pure refrigerants, and for mixtures with R744 - Theoretical calculations in comparison with experimental data](#)

J. Avsec, G. Di Nicola, M. Oblak, F. Polonara

Viscosity

[Viscosity measurements on water vapour and their evaluation](#)

E. Vogel, V. Teske, E. Bich

[Diisodecylphthalate \(DIDP\) – a potential standard of moderate viscosity: Comparative study of surface tension effects on capillary viscometer calibration](#)

F. J. P. Caetano, J. M. N. A. Fareleira, A. Fernandes, C. M. B. P. Oliveira, A. P. Serro, W. A. Wakeham

[Reference data for the viscosity of liquid toluene in wide ranges of temperature – IATP project final report](#)

F. J. V. Santos, C. A. Nieto de Castro, J. H. Dymond, N. K. Dalaouti M. J. Assael, A. Nagashima

[Viscosity studies on poly propylene glycol \(PPG\) in different solvents](#)

K. Venkatramanan, V. Arumugam

[Viscosity measurements on gaseous ethane](#)

D. Seibt, J. Wilhelm, E. Vogel, D. Buttig, E. Hassel

Petroleum

[An analytical consistent pseudo-component delumping procedure for equations of state with non-zero binary interaction parameters](#)

D. V. Nichita, C. F. Leibovici

[Measurement and modeling of hydrocarbon dew points for certain synthetic natural gas mixtures](#)

Ø. Mørch, Kh. Nasrifar, O. Bolland, E. Solbraa, A. O. Fredheim, L. H. Gjertsen

[Thermodynamic properties of natural gas mixtures using equation of state](#)

Kh. Nasrifar, O. Bolland

[Towards asphaltenes characterization by simple measurements](#)

S. Verdier, F. Plantier, D. Bessières, S. I. Andersen, H. Carrier

[The influence of thermophysical properties on vaporisation of liquefied natural gas](#)

V. Vesovic

[Phase equilibrium of aqueous systems containing acid gases - Systems of interest for sequestration](#)

D. Koschel, J. Y. Coxam, V. Majer

Thermal conductivity

[A reference multiparameter thermal conductivity equation for R152a in optimized functional form](#)

G. Scalabrin, P. Marchi, F. Finezzo

[Transport properties of organic liquids: Theoretical models and experimental evidence](#)

G. Latini, G. Passerini

[Thermal properties of perfluorobenzene near the critical point](#)

S. V. Stankus, R. A. Khairulin

[Vapor-liquid equilibria from \(1 bar to 17 bar\) of binary mixtures acetic acid- alkanes by a static apparatus with on-line analysis of the vapour phase](#)

N. Ainous, L. Negadi, A. Hajjaji, I. Mokbel, J. Jose

Fast techniques

[Laser heating in high-temperature thermophysics](#)

M. Sheindlin

[Thermophysical properties of the solid and liquid TA6V titanium alloy](#)

M. Boivineau, C. Cagran, D. Doytier, V. Eyraud, M. H. Nadal, G. Pottlacher, B. Wilthan

[Palladium: Normal spectral emissivity \(at 684.5 nm\) and thermophysical properties at the melting transition and in the liquid state](#)

C. Cagran, G. Pottlacher

[A novel method for measuring specific heat capacity by pulse-heating technique](#)

H. Watanabe

[A new millisecond pulse heating system at the Los Alamos National Laboratory](#)

A. Seifter, M. R. Furlanetto, J. R. Payton, A. W. Obst

[Thermophysical properties of zirconium in a wide temperature range](#)

N. D. Milošević, K. D. Maglić

Transient techniques

[Electric resistivity of aluminium alloys up to and above the melting temperature](#)

R. Brandt, G. Neuer

[On the use of the transient hot strip method for measuring the thermal conductivity of highly conducting thin bars](#)

M. Gustavsson, H. Wang, R M Trejo, E. Lara-Curzio, R. B. Dinwiddie, S. E. Gustafsson

[The virtual experiment design: Optimizing of the transient hot bridge sensor](#)

R. Model, U. Hammerschmidt

[Thermophysical sensors](#)
