

CONTENTS OF VOLUMES 1–6

Volume 1

Acid Deposition and Energy Use
Aggregation of Energy
Aircraft and Energy Use
Air Pollution from Energy Production and Use
Air Pollution, Health Effects of
Alternative Transportation Fuels:
 Contemporary Case Studies
Aluminum Production and Energy
Aquaculture and Energy Use
Arid Environments, Impacts of Energy
 Development in
Batteries, Overview
Batteries, Transportation Applications
Bicycling
Biodiesel Fuels
Biomass, Chemicals from
Biomass Combustion
Biomass for Renewable Energy and Fuels
Biomass Gasification
Biomass: Impact on Carbon Cycle and
 Greenhouse Gas Emissions
Biomass Resource Assessment
Bottom-Up Energy Modeling
Business Cycles and Energy Prices

Carbon Capture and Storage from Fossil
 Fuel Use
Carbon Sequestration, Terrestrial
Carbon Taxes and Climate Change
Cement and Energy
City Planning and Energy Use
Clean Air Markets
Clean Coal Technology
Climate Change and Energy, Overview
Climate Change and Public Health: Emerging
 Infectious Diseases
Climate Change: Impact on the Demand
 for Energy
Climate Protection and Energy Policy
Coal, Chemical and Physical Properties
Coal Conversion
Coal, Fuel and Non-Fuel Uses
Coal Industry, Energy Policy in
Coal Industry, History of
Coal Mine Reclamation and Remediation
Coal Mining, Design and Methods of
Coal Mining in Appalachia, History of
Coal Preparation
Coal Resources, Formation of
Coal Storage and Transportation
Cogeneration

Combustion and Thermochemistry
 Commercial Sector and Energy Use
 Complex Systems and Energy
 Computer Modeling of Renewable Power Systems
 Conservation Measures for Energy, History of
 Conservation of Energy Concept, History of
 Conservation of Energy, Overview
 Consumption, Energy, and the Environment
 Conversion of Energy: People and Animals
 Corporate Environmental Strategy
 Cost–Benefit Analysis Applied to Energy
 Crude Oil Releases to the Environment: Natural Fate and Remediation Options
 Crude Oil Spills, Environmental Impact of
 Cultural Evolution and Energy
 Decomposition Analysis Applied to Energy
 Depletion and Valuation of Energy Resources
 Derivatives, Energy
 Desalination and Energy Use
 Development and Energy, Overview
 Diet, Energy, and Greenhouse Gas Emissions
 Discount Rates and Energy Efficiency Gap
 Distributed Energy, Overview
 District Heating and Cooling
 Early Industrial World, Energy Flow in
 Earth’s Energy Balance
 Easter Island: Resource Depletion and Collapse

Volume 2

Ecological Footprints and Energy
 Ecological Risk Assessment Applied to Energy Development
 Economic Geography of Energy
 Economic Growth and Energy

Economic Growth, Liberalization, and the Environment
 Economics of Energy Demand
 Economics of Energy Efficiency
 Economics of Energy Supply
 Economic Systems and Energy, Conceptual Overview
 Economic Thought, History of Energy in
 Ecosystem Health: Energy Indicators
 Ecosystems and Energy: History and Overview
 Electrical Energy and Power
 Electricity, Environmental Impacts of
 Electricity Use, History of
 Electric Motors
 Electric Power: Critical Infrastructure Protection
 Electric Power Generation: Fossil Fuel
 Electric Power Generation: Valuation of Environmental Costs
 Electric Power Measurements and Variables
 Electric Power Reform: Social and Environmental Issues
 Electric Power Systems Engineering
 Electric Power: Traditional Monopoly Franchise Regulation and Rate Making
 Electric Power: Transmission and Generation Reliability and Adequacy
 Electromagnetic Fields, Health Impacts of
 Electromagnetism
 Energy Analysis and Environmental Accounting
 Energy Development on Public Land in the United States
 Energy Efficiency and Climate Change
 Energy Efficiency, Taxonomic Overview
 Energy Futures and Options
 Energy in the History and Philosophy of Science
 Energy Ladder in Developing Nations
 Energy Services Industry

Entrainment and Impingement of Organisms in
Power Plant Cooling

Entropy

Entropy and the Economic Process

Environmental Change and Energy

Environmental Gradients and Energy

Environmental Injustices of Energy Facilities

Environmental Kuznets Curve

Equity and Distribution in Energy Policy

Ethanol Fuel

European Union Energy Policy

Evolutionary Economics and Energy

Exergoeconomics

Exergy

Exergy Analysis of Energy Systems

Exergy Analysis of Waste Emissions

Exergy: Reference States and Balance Conditions

Experience Curves for Energy Technologies

External Costs of Energy

Fire: A Socioecological and Historical Survey

Fisheries and Energy Use

Flywheels

Food Capture, Energy Costs of

Food System, Energy Use in

Forest Products and Energy

Forms and Measurement of Energy

Fuel Cells

Fuel Cell Vehicles

Fuel Cycle Analysis of Conventional and
Alternative Fuel Vehicles

Fuel Economy Initiatives: International
Comparisons

Fuzzy Logic Modeling of Energy Systems

Gas Hydrates

Gasoline Additives and Public Health

Geographic Thought, History of Energy in

Geopolitics of Energy

Geothermal Direct Use

Geothermal Power Generation

Volume 3

Glass and Energy

Global Energy Use: Status and Trends

Global Material Cycles and Energy

Goods and Services: Energy Costs

Green Accounting and Energy

Greenhouse Gas Abatement: Controversies in
Cost Assessment

Greenhouse Gas Emissions, Alternative
Scenarios of

Greenhouse Gas Emissions from Energy
Systems, Comparison and Overview

Ground-Source Heat Pumps

Gulf War, Environmental Impact of

Hazardous Waste from Fossil Fuels

Heat Islands and Energy

Heat Transfer

Heterotrophic Energy Flows

Human Energetics

Hunting and Gathering Societies, Energy
Flows in

Hybrid Electric Vehicles

Hybrid Energy Systems

Hydrogen, End Uses and Economics

Hydrogen, History of

Hydrogen Production

Hydrogen Storage and Transportation

Hydropower Economics

Hydropower, Environmental Impact of

Hydropower, History and Technology of

Hydropower Resettlement Projects,
Socioeconomic Impacts of

Hydropower Resources
 Hydropower Technology
 Indoor Air Quality in Developing Nations
 Indoor Air Quality in Industrial Nations
 Industrial Agriculture, Energy Flows in
 Industrial Ecology
 Industrial Energy Efficiency
 Industrial Energy Use, Status and Trends
 Industrial Symbiosis
 Inflation and Energy Prices
 Information Technology and Energy Use
 Information Theory and Energy
 Innovation and Energy Prices
 Input–Output Analysis
 Integration of Motor Vehicle and Distributed
 Energy Systems
 Intelligent Transportation Systems
 Internal Combustion Engine Vehicles
 Internal Combustion (Gasoline and Diesel)
 Engines
 International Comparisons of Energy End Use:
 Benefits and Risks
 International Energy Law and Policy
 Investment in Fossil Fuels Industries
 Labels and Standards for Energy
 Land Requirements of Energy Systems
 Leisure, Energy Costs of
 Life Cycle Analysis of Power Generation
 Systems
 Life Cycle Assessment and Energy Systems
 Lifestyles and Energy
 Lithosphere, Energy Flows in
 Livestock Production and Energy Use
 Lunar–Solar Power System
 Magnetic Levitation
 Magnetohydrodynamics

Manufactured Gas, History of
 Marine Transportation and Energy Use
 Market-Based Instruments, Overview
 Market Failures in Energy Markets
 Markets for Biofuels
 Markets for Coal
 Markets for Natural Gas
 Markets for Petroleum
 Marx, Energy, and Social Metabolism
 Material Efficiency and Energy Use
 Materials for Solar Energy
 Material Use in Automobiles

Volume 4

Mechanical Energy
 Media Portrayals of Energy
 Microtechnology, Energy Applications of
 Migration, Energy Costs of
 Modeling Energy Markets and Climate
 Change Policy
 Modeling Energy Supply and Demand: A
 Comparison of Approaches
 Motor Vehicle Use, Social Costs of
 Multicriteria Analysis of Energy
 National Energy Modeling Systems
 National Energy Policy: Brazil
 National Energy Policy: China
 National Energy Policy: India
 National Energy Policy: Japan
 National Energy Policy: United States
 Nationalism and Oil
 National Security and Energy
 Natural Gas, History of
 Natural Gas Industry, Energy Policy in

- Natural Gas Processing and Products
 Natural Gas Resources, Global Distribution of
 Natural Gas Resources, Unconventional
 Natural Gas Transportation and Storage
 Net Energy Analysis: Concepts and Methods
 Neural Network Modeling of Energy Systems
 Nongovernmental Organizations (NGOs)
 and Energy
 Nuclear Engineering
 Nuclear Fission Reactors: Boiling Water and
 Pressurized Water Reactors
 Nuclear Fuel: Design and Fabrication
 Nuclear Fuel Reprocessing
 Nuclear Fusion Reactors
 Nuclear Power Economics
 Nuclear Power, History of
 Nuclear Power Plants, Decommissioning of
 Nuclear Power: Risk Analysis
 Nuclear Proliferation and Diversion
 Nuclear Waste
 Obstacles to Energy Efficiency
 Occupational Health Risks in Crude Oil and
 Natural Gas Extraction
 Occupational Health Risks in Nuclear Power
 Ocean, Energy Flows in
 Ocean Thermal Energy
 Oil and Natural Gas Drilling
 Oil and Natural Gas: Economics of Exploration
 Oil and Natural Gas Exploration
 Oil and Natural Gas Leasing
 Oil and Natural Gas Liquids: Global Magnitude
 and Distribution
 Oil and Natural Gas: Offshore Operations
 Oil and Natural Gas Resource Assessment:
 Classifications and Terminology
 Oil and Natural Gas Resource Assessment:
 Geological Methods
 Oil and Natural Gas Resource Assessment:
 Production Growth Cycle Models
 Oil Crises, Historical Perspective
 Oil Industry, History of
 Oil-Led Development: Social, Political, and
 Economic Consequences
 Oil Pipelines
 Oil Price Volatility
 Oil Recovery
 Oil Refining and Products
 Oil Sands and Heavy Oil
 Oil Shale
 OPEC, History of
 OPEC Market Behavior, 1973–2003
 Origin of Life and Energy
 Passenger Demand for Travel and Energy Use
 Peat Resources
 Petroleum Property Valuation
 Petroleum System: Nature's Distribution System
 for Oil and Gas
-
- Volume 5***
 Philanthropy and Energy
 Photosynthesis and Autotrophic Energy Flows
 Photosynthesis, Artificial
 Photovoltaic Conversion: Space Applications
 Photovoltaic Energy: Stand-Alone and
 Grid-Connected Systems
 Photovoltaic Materials, Physics of
 Photovoltaics, Environmental Impact of
 Physics and Economics of Energy, Conceptual
 Overview
 Plastics Production and Energy
 Polar Regions, Impacts of Energy Development
 Population Growth and Energy

Potential for Energy Efficiency: Developing Nations	Solar Cooling, Dehumidification, and Air-Conditioning
Prices of Energy, History of	Solar Detoxification and Disinfection
Public Reaction to Electricity Transmission Lines	Solar Distillation and Drying
Public Reaction to Energy, Overview	Solar Energy, History of
Public Reaction to Nuclear Power Siting and Disposal	Solar Fuels and Materials
Public Reaction to Offshore Oil	Solar Heat Pumps
Public Reaction to Renewable Energy Sources and Systems	Solar Ponds
Radiation, Risks and Health Impacts of	Solar Thermal Energy, Industrial Heat Applications
Rebound Effect of Energy Conservation	Solar Thermal Power Generation
Recycling of Metals	Solar Water Desalination
Recycling of Paper	Steel Production and Energy
Refrigeration and Air-Conditioning	Stock Markets and Energy Prices
Remote Sensing for Energy Resources	Storage of Energy, Overview
Renewable Energy and the City	Strategic Petroleum Reserves
Renewable Energy in Europe	Subsidies to Energy Industries
Renewable Energy in Southern Africa	Suburbanization and Energy
Renewable Energy in the United States	Sun, Energy from
Renewable Energy Policies and Barriers	Sustainable Development: Basic Concepts and Application to Energy
Renewable Energy, Taxonomic Overview	System Dynamics and the Energy Industry
Renewable Portfolio Standard	
Reproduction, Energy Costs of	
Research and Development Trends for Energy	<i>Volume 6</i>
Resource Curse and Investment in Energy Industries	Tanker Transportation
Reuse and Energy	Taxation of Energy
Risk Analysis Applied to Energy Systems	Technology Innovation and Energy
Rocket Engines	Temperature and Its Measurement
Rural Energy in China	Thermal Comfort
Rural Energy in India	Thermal Energy Storage
Service and Commerce Sector, Energy Use in	Thermal Pollution
Sociopolitical Collapse, Energy and	Thermodynamics and Economics, Overview
Solar Cells	Thermodynamic Sciences, History of
Solar Cookers	Thermodynamics, Laws of
	Thermoregulation

- Tidal Energy
- Trade in Energy and Energy Services
- Transitions in Energy Use
- Transportation and Energy, Overview
- Transportation and Energy Policy
- Transportation Fuel Alternatives for Highway Vehicles
- Turbines, Gas
- Turbines, Steam
- Ultralight Rail and Energy Use
- United Nations Energy Agreements
- Uranium and Thorium Resource Assessment
- Uranium Mining: Environmental Impact
- Uranium Mining, Processing, and Enrichment
- Urbanization and Energy
- Value Theory and Energy
- Vehicles and Their Powerplants: Energy Use and Efficiency
- War and Energy
- Waste-to-Energy Technology
- Wave and Tidal Energy Conversion
- Wetlands: Impacts of Energy Development in the Mississippi Delta
- Wind Energy Economics
- Wind Energy, History of
- Wind Energy Technology, Environmental Impacts of
- Wind Farms
- Wind Resource Base
- Women and Energy: Issues in Developing Nations
- Wood Energy, History of
- Wood in Household Energy Use
- Work, Power, and Energy
- World Environment Summits: The Role of Energy
- World History and Energy
